

The Do Not Call List should apply to ALL businesses, charities, political parties, radio and TV stations, and any other organizations that are "exempt." My privacy is being violated when these people call me. Some judges are worried about free speech violations, to them I say that these companies can still take out ads on TV, radio, billboards, newspapers, and magazines. They do not need to be able to advertise in my telephone whenever they feel like calling me. One of the primary reasons I got caller ID and an answering machine was to screen my calls. Therefore, the telemarketers have cost me money and still are as the telephone companies charge me to have caller ID.

Ban them all or find a way to get rid of them. No one wants them. If I want to buy something, I'll go to a store.

Thanks for trying to get this going. Keep fighting for us.
